MR GREG MARSHALL
BOX 93
MINERSVILLE UT 84752

Dear Mr. Marshall:

Re: Milford Distribution System
ORDER

I received your letter yesterday containing your proposal to use the Utah Power and Light meter readings to determine the amount of water you have pumped. I believe that earlier we discussed this over the telephone and I told you this would be acceptable on a temporary basis if we received a written plan from you giving a specific date when meters would be installed. Your letter only indicates that you would put meters on when you can afford them.

We have been willing to allow some leeway in compliance with this ORDER as long as the water user had a specific plan for installing the meters. We must treat all water users the same. Therefore, I cannot accept your proposal because it lacks a specific date when the meters will be installed. The date for installation of the meters should be within a reasonable period of time, at the very latest before the beginning of the next irrigation season.

The Attorney General has informed me that he is beginning legal proceedings against those users who are not in compliance with the ORDER. Right now your name is on that list, however, it can be removed by submitting a specific plan as described above. If, after you submit a plan, meters are not installed by the date proposed, legal proceedings will commence immediately against you.

If you have any questions, please contact me at 538-7380.

Sincerely,

Lee H. Sim, P.E.

Assistant State Engineer
for Distribution/Adjudication
